

Eyes of love

What I see here tonight, is a baby in a manger  
His parents fussing around  
As they are astounded by shepherds and strangers  
And angels who are singing aloud

Christ eternal  
God with us  
Lord of all  
Yet one of us  
No one has ever seen the face of God  
but now that the Savior has come  
I see the eyes of love

As I struggle to find my own path in this life  
Thinking 'bout why we are here  
I'll just stare at the mystery, at this Christmas child  
And see all of my fears disappear

I will walk a thousand miles  
(And) I will dive to the depths of my soul  
I will lift my eyes to the skies  
Just to see you,  
(and) find you in it all

When I've lost all my hopes  
When there's nothing left to trust  
And I... just don't know.. Jesus  
You let go of Your glory just to be with me now  
'cause You became what You loved
